

LINE SYMMETRY

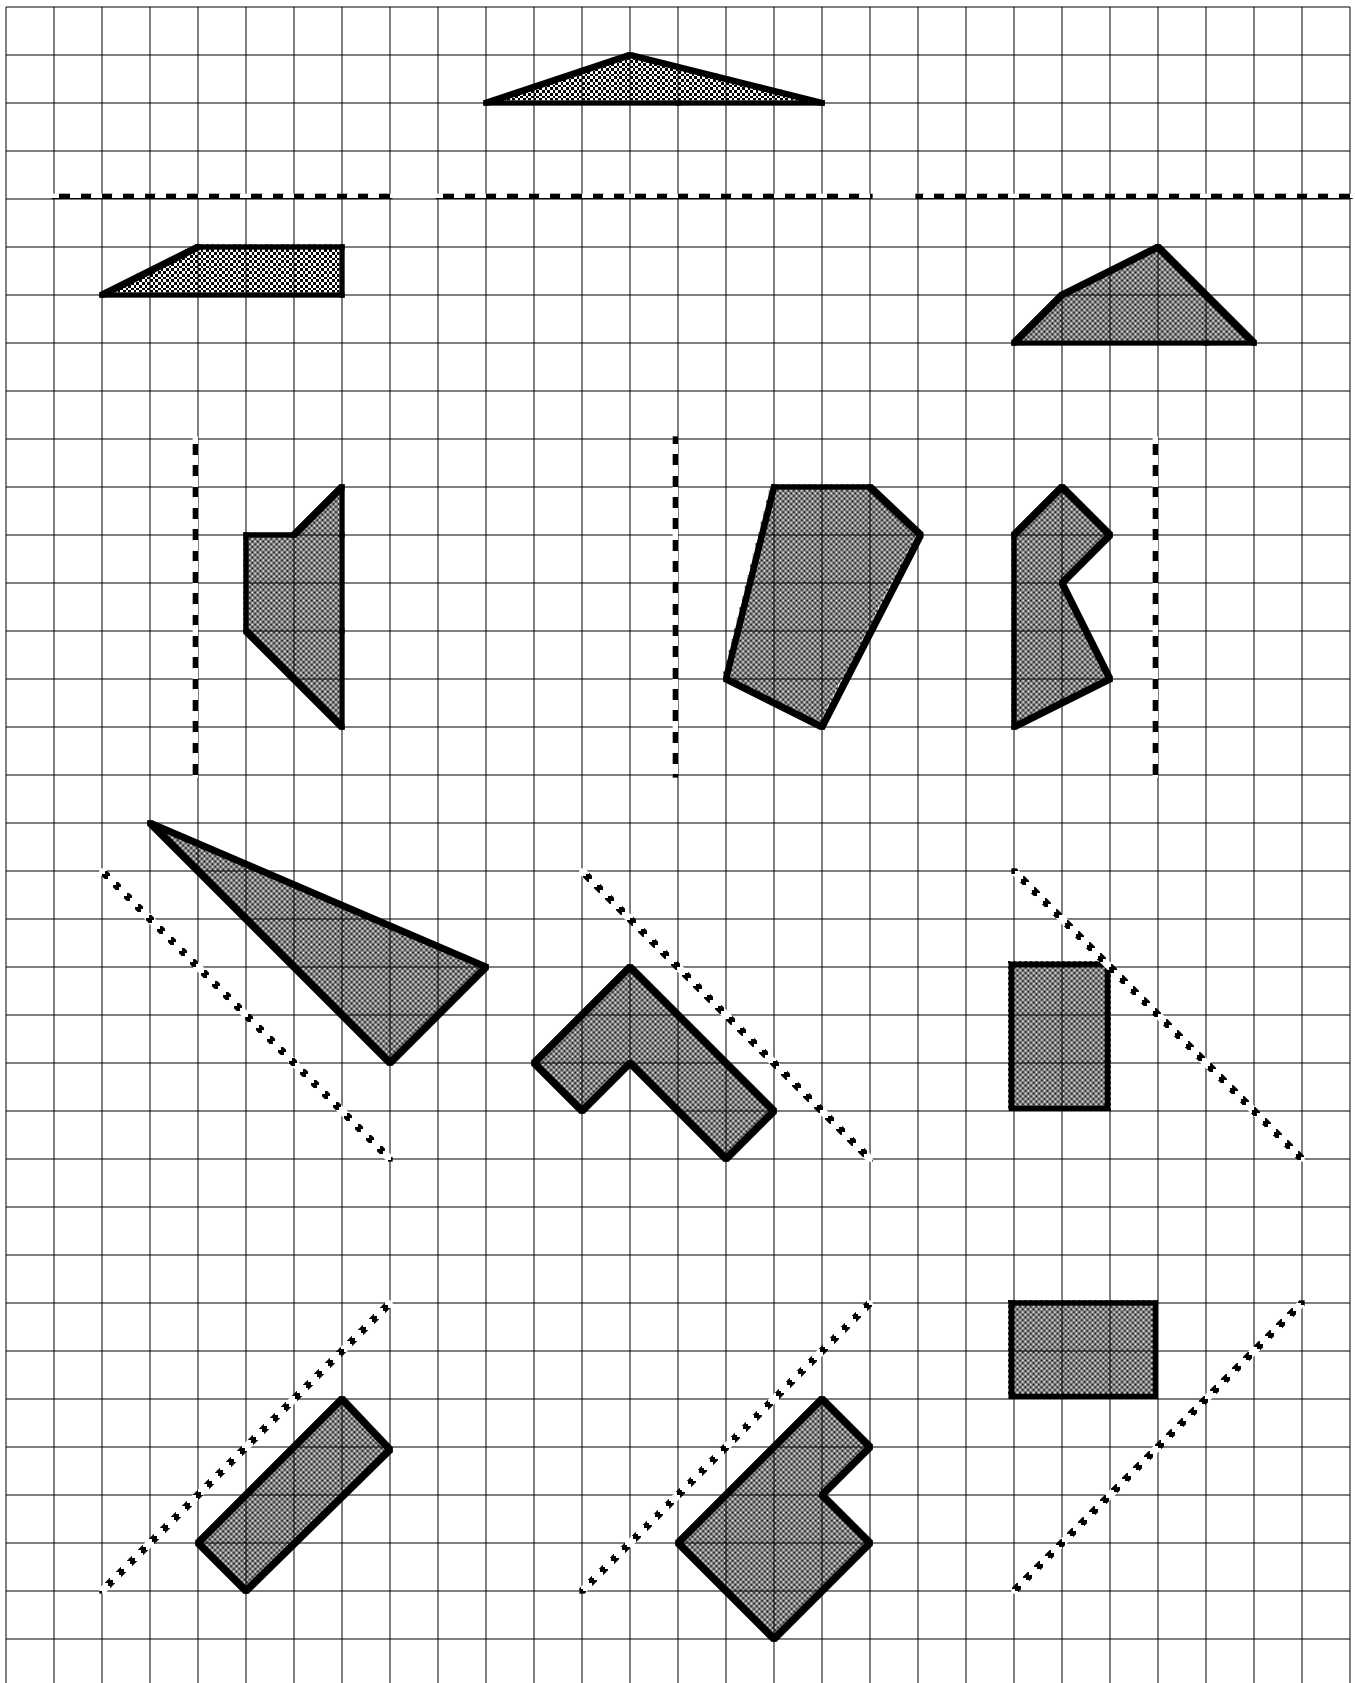

NAME: _____ CLASS: _____

1. Complete the following diagrams so that they have line symmetry about the dotted line.

The grid contains 16 geometric shapes, each with a dotted line indicating a line of symmetry. The shapes are arranged in four rows:

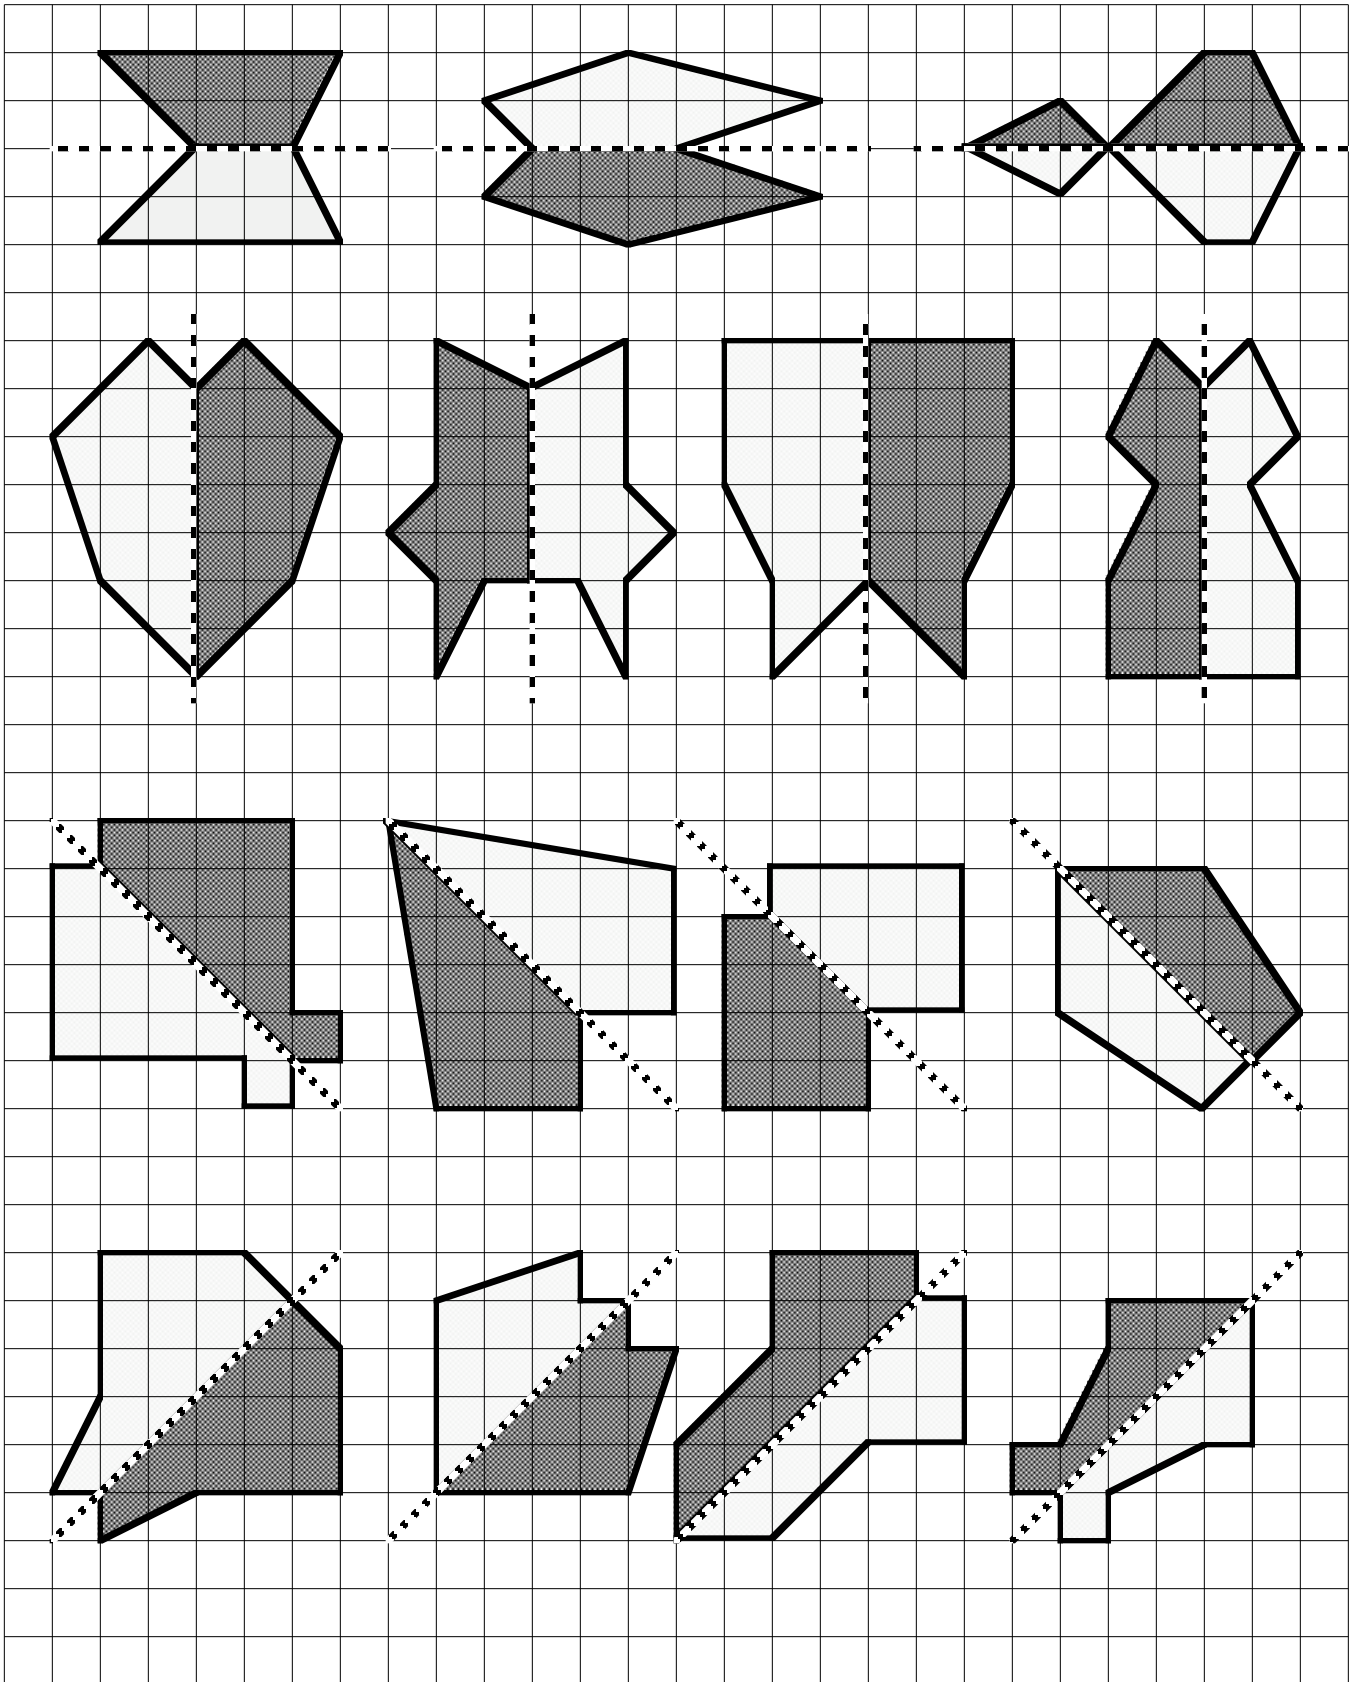

- Row 1: 1. A trapezoid with a dotted vertical line of symmetry. 2. A pentagon with a dotted vertical line of symmetry. 3. A complex shape with a dotted horizontal line of symmetry.
- Row 2: 1. A shape with a dotted vertical line of symmetry. 2. A shape with a dotted vertical line of symmetry. 3. A shape with a dotted vertical line of symmetry. 4. A shape with a dotted vertical line of symmetry.
- Row 3: 1. A shape with a dotted diagonal line of symmetry. 2. A shape with a dotted diagonal line of symmetry. 3. A shape with a dotted diagonal line of symmetry. 4. A shape with a dotted diagonal line of symmetry.
- Row 4: 1. A shape with a dotted diagonal line of symmetry. 2. A shape with a dotted diagonal line of symmetry. 3. A shape with a dotted diagonal line of symmetry. 4. A shape with a dotted diagonal line of symmetry.

2. Complete the following diagrams so that they have line symmetry about the dotted line.

ANSWERS

1.

2.
