

# SYMMETRY

NAME: \_\_\_\_\_ CLASS: \_\_\_\_\_

1. Complete the following diagrams so that they have line symmetry about the dotted line.

The grid contains the following shapes for completion:

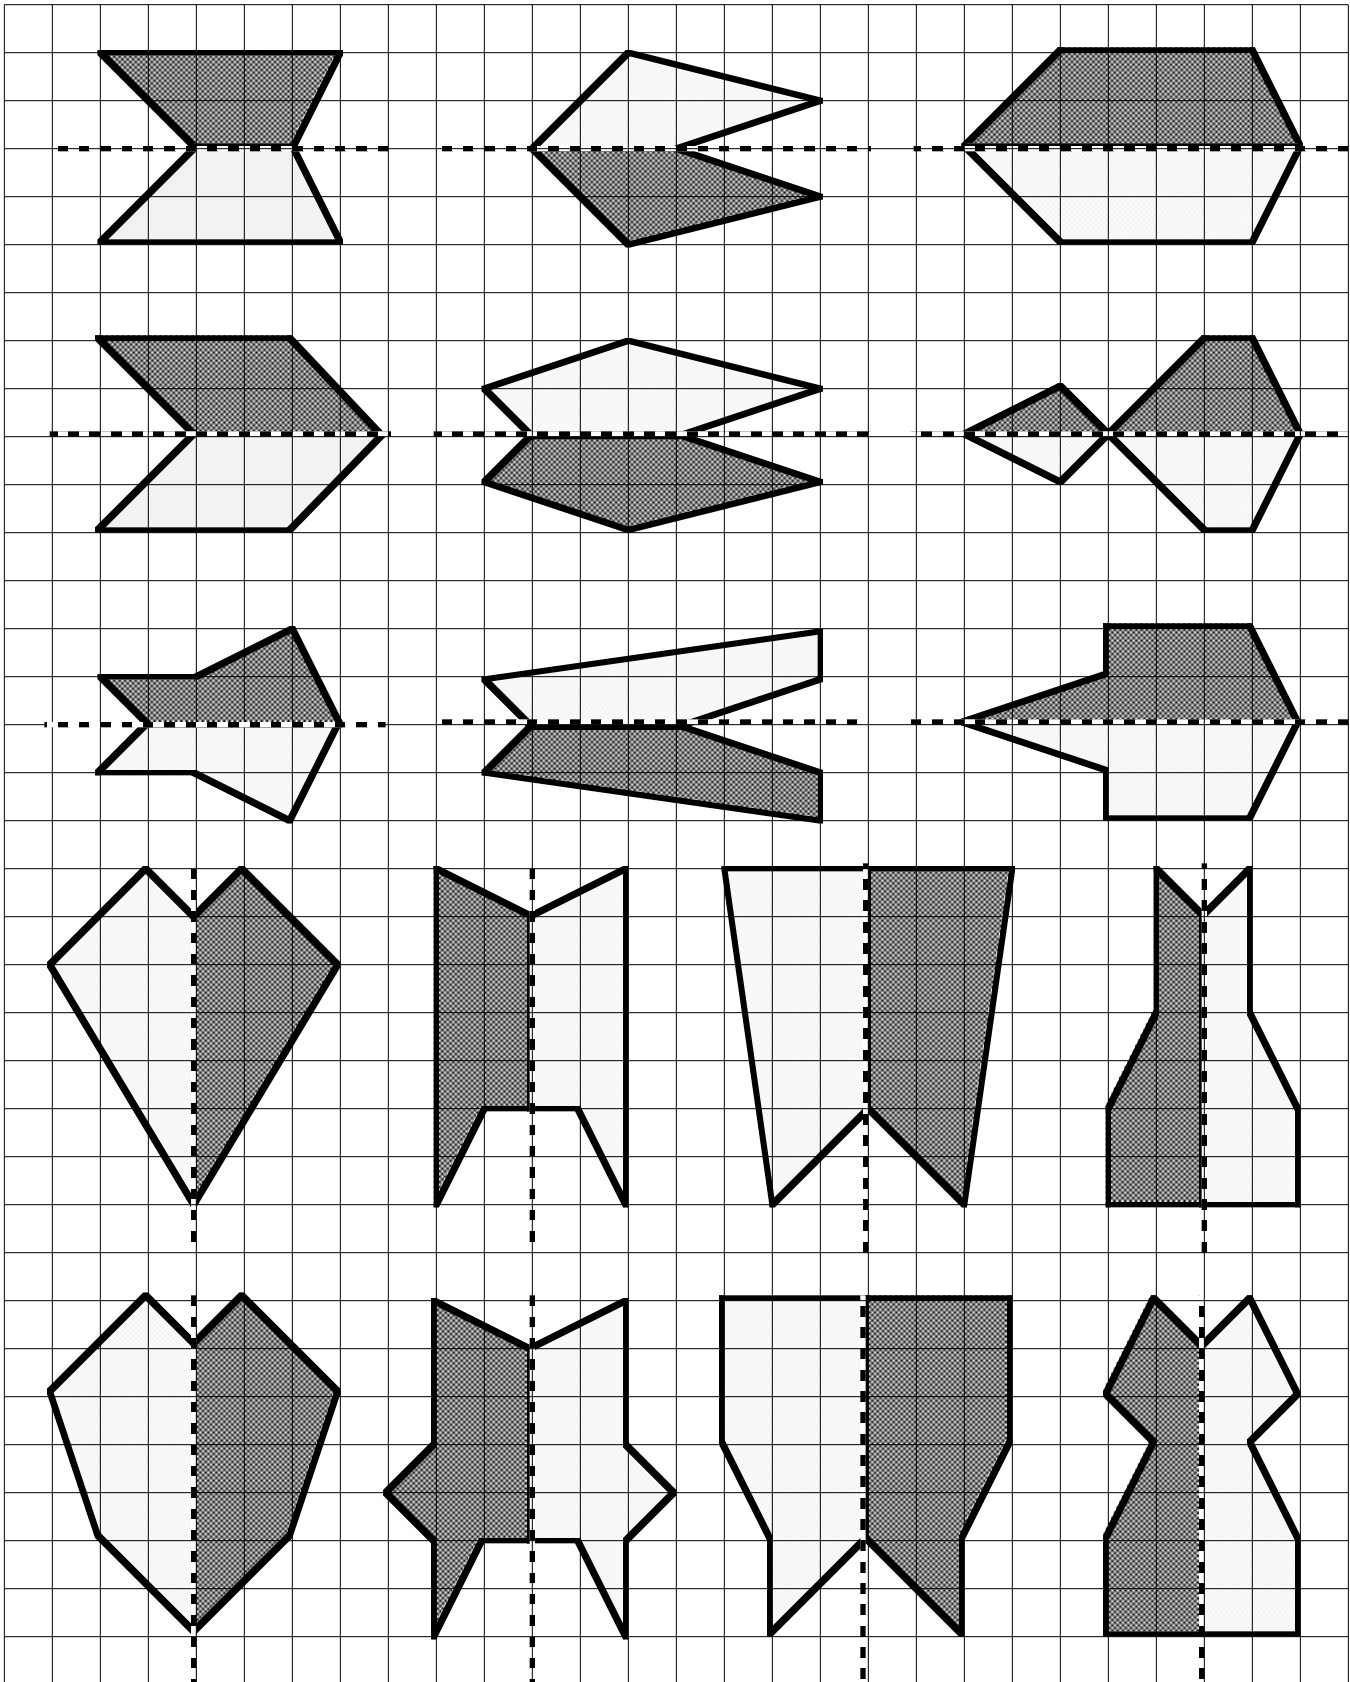

- Row 1: A trapezoid on the left side of a horizontal dotted line; a triangle on the right side of a horizontal dotted line; a trapezoid on the right side of a horizontal dotted line.
- Row 2: A parallelogram on the left side of a horizontal dotted line; a pentagon on the right side of a horizontal dotted line; a complex shape on the right side of a horizontal dotted line.
- Row 3: A complex shape on the left side of a horizontal dotted line; a trapezoid on the right side of a horizontal dotted line.
- Row 4: A complex shape on the left side of a vertical dotted line; a complex shape on the right side of a vertical dotted line.
- Row 5: A complex shape on the left side of a vertical dotted line; a complex shape on the right side of a vertical dotted line.
- Row 6: A complex shape on the left side of a vertical dotted line; a complex shape on the right side of a vertical dotted line.
- Row 7: A complex shape on the left side of a vertical dotted line; a complex shape on the right side of a vertical dotted line.
- Row 8: A complex shape on the left side of a vertical dotted line; a complex shape on the right side of a vertical dotted line.
- Row 9: A complex shape on the left side of a vertical dotted line; a complex shape on the right side of a vertical dotted line.
- Row 10: A complex shape on the left side of a vertical dotted line; a complex shape on the right side of a vertical dotted line.

2. Complete the following diagrams so that they have line symmetry about the dotted line.
